

Maybury can furnish carts in a variety of styles and capacities, all constructed for rugged use. We can also supply replacement casters and wheels in virtually any style or material.

Rack Guards

Steel Rack Guards help keep items from falling and are an essential addition to your pallet rack system. Available in stock widths from 7 to 12 feet and heights from 3 to 5 feet. Panels are attached to pallet rack systems using spacer clips. Heavy-duty 10 gauge 1-1/2" diamond wire mesh welded to a steel angle frame encloses the rack while still providing inventory visibility. Available in Hi Hyde Yellow finish.

Metro Carts

Utility Carts

Metro's utility carts are ideal for routine movement of supplies or use as an equipment stand. Available in wire, solid or polymer in various colors, these carts can range from general purpose to all stainless steel for the harshest environments.

Supply and Transport Carts

Configured from our shelving systems, you can specify size, finish, number of shelves, accessories and so on – or you can order from a selection of preconfigured units. Your choice of polymer shelf systems or solid or wire systems in various finishes to suit your environment.

Enclosed Carts

These carts can serve many purposes such as containment or protection from theft or contamination, or can simply be used to hide items from plain view. As such, there are various styles to choose from for a multitude of applications.

Specialty Carts

There are applications that require unique configurations, special accessories or a specific design to meet very specific needs. Below is a sample of the Metro specialty carts offered by Maybury.

- Food service, banquet and dish carts
- Laboratory and research carts
- Healthcare and surgical carts
