Excellence Meets Clean

Multi-Clean

Cleaning Supplies

Do your floors reflect your company image? Looking for ways to increase employee productivity? Contact Maybury's product specialist for a free facility evaluation.

For over 60 years, Multi-Clean has successfully delivered high quality chemical products for all floor types, including resilient tile, hard floors, carpet, concrete and wood, to customers, cleaning contractors and government agencies. This penchant for high quality extends to the Multi-Clean state-of-the-art research and development lab where chemists formulate and engineer maintenance chemicals specifically designed to work with all floor care equipment.

Maybury Material Handling is pleased to partner with Multi-Clean, an environmentally responsible company that is committed to providing a wide array of quality maintenance products, education, and training resources to help maintain healthy and clean facilities.

Multi-Clean's Max 33 floor finish contains 33% solids, which results in higher gloss with fewer coats. Max 33 goes down fast using their Micro-Mop Speed applicator or mop, levels great, and dries to a durable shine. Max 33 offers a great opportunity to increase productivity, reduce labor costs, and shorten dry times, which can result in substantial cost savings.

The Multi-Task Dilution Control System was introduced to fulfill the need to cut costs in daily maintenance using a patent pending bottle design. The system includes 22 individual products packaged in the graduated spout bottle, the two-button wall mount dispenser, and the portable handgun.

In addition to the full line of exceptional products, Multi-Clean has introduced the most revolutionary floor coating system in the past 20 years: the UV Floor Coating System. The Multi-Clean UV System includes UV Brilliance, Ultra-Primer, Tough Green Cleaner, and Ultra Stripper for VCT and sheet vinyl surfaces. This system combines the ease of application, recoating and removal of a traditional floor finish with the durability and no-burnish gloss of ultraviolet cured coatings. The new Micro-Mop Speed Applicator makes applying UV Brilliance fast and simple.
