

*Maybury offers conveyors to meet all types of industrial requirements. We can also provide design, fabrication and installation services for customized industrial conveyor systems.*

## Belt Conveyors

Belt conveyors are one of the most widely used package handling power conveyors. Their construction is inexpensive, simple, quiet, and easy to install. They are frequently used for assembly operations and general transportation.

- Model RB  
Roller Bed Conveyor**
- Conveyor sets up quickly and easily to save on installation time
  - Bed - 6-1/2" deep x 12 ga. formed steel frame
  - Rollers - 1.9" dia. x 16 ga. galvanized rollers spaced every 6"

- ProSort 421 & 431  
High-Speed Sortation**
- Bed - 21" deep x 1-1/2" x 7/8" flange, 10 ga. formed steel frame
  - Capacity - max. load 50 lbs. per foot.
  - Air Requirements - 60 p.s.i.
  - Overall Widths: 33", 39", 45", 51" and 57"
  - Adjustable floor supports available

- High-Speed Pusher**
- Provides high-speed automatic product diversion
  - Product may be diverted 90° onto another conveyor, chute, etc.
  - Capacity-75 lbs. maximum package weight

### Chain-Driven Curve Conveyor

- Used in conjunction with the 25/26-CRR conveyor to carry heavy unit loads such as pallets and drums
- Chain-driven tread rollers
- Capacity-4000 lbs.

### Model 138-ACC

#### Light-Duty Accumulating Conveyor

- Basic design allows a minimum of 2% back pressure
- Reversible
- Finger tip pressure roller adjustment - no tools required
- Overall Widths: 33", 39", 45", 51" and 57"
- Adjustable floor supports available

### Double Powered Pivot Diverter

- Designed for use with accumulating conveyors
- Products are automatically diverted onto adjacent 30° spur lines
- Cycles up to 40 times per minute

### Floor-to-Floor Roller Bed

- Motor: 1 HP C-Face "SSB" series brake motor
- Adjustable double noseover ensures smooth transfer
- Reversible
- Multiple belt widths

Maybury offers conveyors to meet all types of industrial requirements. We can also provide design, fabrication and installation services for customized industrial conveyor systems.

## Gravity Conveyors

Hytrol offers a complete selection of gravity conveyors, which move objects without power. Use gravity to your advantage! Many styles and options provide efficient and low-cost material handling solutions. Maybury also installs pre-configured units, consisting of complete ready-to-use conveyor sections. They include floor supports, optional end stops and guard rails, and a selectable height range.

### Light-Duty Gravity

- Convey lightweight packages
- Set up temporary conveyor lines
- Used in warehousing, shipping departments and assembly areas

### Medium-Duty Gravity

- Ready-to-use conveyor sections
- Include floor supports
- Optional guard rails, end stops
- Selectable height range

### Heavy-Duty Gravity

- Useful in abusive applications
- Good for wide loads, including pallets
- The workhorses of the industry

## Accessories

All the extras needed to complete your system including supports, stops, guard rails, gates, and ball transfer tables.

### Supports

- Permanent floor supports
- Temporary floor supports
- Poly-tier supports
- Ceiling supports

### Stops

- Angle end stops
- Dead stops
- Optional guard rails, end stops
- Terminating end stops
- Easily attached to conveyor

### Guard Rails

- Adjustable channel guard rail
- Angle guard rail
- Channel guard rail

### Gates

- Safety gate latch
- 3 ft., 4 ft., & 5 ft. lengths
- Manual or spring-balanced

### Ball Transfer Table

- 1 in. dia. ball caster table
- 3 in. or 4 in. ball centers
- 3-1/2 in. or 2-1/2 in. frames

### Casters

- Casters are an optional accessory that can make a conveyor movable
- Available in 4 in. and 6 in. diameters
- Floor locks and wheel brakes available as standard options
